

1 ---
2 Title: Refund policy
3 Category: billing
4
5 Refunds are available within 30 days of purchase for annual plans, and 14 days for monthly plans. To request a refund go to Billing > Request Refund or email support@company.com. Refunds are processed within 5-7 business days to the original payment method. Partial refunds are not available.
6 ---
7 Title: Password reset
8 Category: account
9
10 To reset your password go to Settings > Security > Reset Password. You will receive an email with a reset link valid for 24 hours. If you do not receive the email check your spam folder or verify your account email is correct by contacting support.
11 ---
12 Title: Upgrading or downgrading your plan
13 Category: billing
14
15 You can upgrade your plan anytime from Settings > Billing > Change Plan. Upgrades take effect immediately and you are charged a prorated amount. Downgrades take effect at the start of the next billing cycle. You will not lose any data when changing plans.
16 ---
17 Title: API rate limits
18 Category: technical
19
20 Free tier: 100 requests per hour. Pro tier: 5000 requests per hour. Enterprise: custom limits. Requests that exceed the rate limit return HTTP 429. Rate limits reset at the top of each hour. Contact support to request a temporary limit increase.
21 ---
22 Title: Exporting your data
23 Category: technical
24
25 Go to Settings > Data > Export. You can export as CSV or JSON format. Exports for accounts with over 100000 records may take up to 24 hours and will be emailed as a download link valid for 7 days. There is no limit on how often you can export.
26 ---
27 Title: Deleting your account
28 Category: account
29
30 Account deletion is permanent and cannot be undone. Go to Settings > Account > Delete Account and confirm via email. All your data is permanently removed within 30 days per our data retention policy. You will lose access immediately after confirming deletion.
31 ---
32 Title: Two-factor authentication
33 Category: account

34
35 Enable 2FA under Settings > Security > Two-Factor Authentication. We support authenticator apps such as Google Aut
henticator and Authy as well as SMS. Authenticator apps are recommended as SMS can be intercepted. Save your backu
p codes in a safe place. You can disable 2FA from the same settings page.

36 ---

37 Title: Failed payment troubleshooting
38 Category: billing

39

40 If a payment fails we retry automatically 3 times over 7 days. Common causes are an expired card, insufficient fun
ds, or bank decline for international transactions. Update your payment method under Billing > Payment Methods to
trigger an immediate retry. If the problem persists contact your bank.

41 ---

42 Title: Contacting support
43 Category: general

44

45 You can reach our support team via email at support@company.com or through the in-app chat. Support is available M
onday to Friday 9am to 6pm UTC. Response time is under 4 hours for Pro and Enterprise plans and under 24 hours for
Free plans. For urgent issues Pro and Enterprise customers can request a callback.

46 ---

47 Title: Single sign-on setup
48 Category: technical

49

50 SSO is available on Enterprise plans only. We support SAML 2.0 and OAuth 2.0. To set up SSO go to Settings > Secur
ity > Single Sign-On and follow the configuration guide for your identity provider. Contact your account manager f
or help configuring Okta, Azure AD, or Google Workspace.
